FUTURE COMPUTERS?

We're about to change how American business views the computer industry.

A computer revolution of enormous magnitude is about to take place.

Because Europe's most successful business computer company is now doing business in America. Introducing Apricot. A full line of computers specifically designed for business.

Not adapted to it.

In fact, the facts speak for themselves.

Apricots are elegant and compact 16-bit computers. They employ the MS-DOS operating system, and a minimum of 256K memory. One of our models, the Apricot Xi, boasts an incredible

one Megabyte of memory, and features a Winchester hard disk with 20 Megabytes of storage. We also have models that feature speech recognition, full-size LCD, and icon driven menus.

In addition, you also have a choice between 9" or 12" b/w or 10" color monitors. All of which

have a higher screen resolution than Apple.

And as if that weren't enough, all of our models can be networked from the moment you take them out of the box. They're also capable of running thousands of business software programs specially written for Apricot on 3 1/2 inch disks.

So, if you still think that Apple is a better business computer, look at it from a different perspective.

It's not.

Apricot, Inc., 3375 Scott Boulevard, Santa Clara, CA 95054. Call 800-227-6703, or in California 800-632-7979.

The Apricot Xi. 1MB RAM. 20Mb hard disk. 720K floppy diskette. MS-DOS. \$4495 (excluding monitor).
